(a) certified sizes in dimension $s = 3$
$p = 37$
classical: Faure, Sobol', Halton-type
none
residue sequence (Sec. 5)
.600
staggered residue sequence (Sec. 5)
.216
block-periodic, $\ell = s$ (Sec. 6)
.945
two families, $\ell = 4$ (Sec. 6)
.945 / .600
1 3 6 9 12 15 18 21 24 27
exponent m of the prefix P_m ($N = p^m$ points); shaded: full levels $m \in 3\mathbb{N}$
(b) exact separation in dimension $s = 2$, $p = 5$
exact sep(P_m)
0.0 0.2 0.4 0.6
1 2 3 4 5 6 7 8 9 10
m
residue sequence, $v = (2, -1)$
brick wall W^-
block-periodic, $\ell = s$
certified size
size outside the family
certified lower bound
